

Fiberglass Conduit Rodders & Fish Tapes

More than twenty-five years ago, Jameson began producing fiberglass fish tapes and conduit rodders to serve the safety and reliability needs of our valued customers.

Today's Buddy® System is the result of applications and suggestions presented by our customers combined with the innovative spirit of Jameson to develop products that meet our customers' needs.

With non-conductive rods of 1/8" to 1/2" in diameter and 50' to 1,000' in length, we are proud to present the most comprehensive line of fish tapes and rodders available.

Whether installing short run electrical wire or running long distance copper, coax or fiber optic cable, Jameson has a Buddy® to handle the job for you.

The Jameson Fiberglass Advantage

- Fiberglass core is coated with high visibility polymer sheath to protect against rod abrasion and reduce friction.
- Round, flexible rod slides easily over wires in occupied conduit
- Exceptional bending strength for maneuvering tight turns
 - Fiberglass is non-conductive and will not kink
- Accessories attach to fiberglass rod for greater versatility and easier fishing

	Rod Diameter	Rod Core	Lengths Available	Tensile/Pull Strength*	Bend Radius	Recommended Conduit	Usage
Wee Buddy®	1/8"	.080"	50' - 150'	200-lb	1.5"	1/2"+	Inside wiring in occupied conduit
