

## Fiber Optic Shears

High carbon stainless steel blades cut Kevlar® fibers, soft cable, wire insulation, tape, cable ties and other electronic materials. The notched, serrated edge grips material and removes wire jacket.

Ergonomic handles are made of a high strength fiberglass/nylon blend.

Web belt pouch included.

Shears measure 5.5" with a 1.625" cutting length.

## Hawkbill Skinning Knife

Designed to remove cable jackets in line work, Jameson's Hawkbill Skinning Knife is also a popular all-purpose knife.

Polished, high carbon steel blade is ice-tempered to maintain edge longer. The curved, double-edged blade easily cuts through cable jackets and insulation.

Features an ergonomic, cushioned handle with an expanded end to protect hand from slippage and a convenient built-in ring.

10" X 2"
