

Double Lock™ Telescoping Poles

The leader in fiberglass poles brings you a high quality, lightweight telescoping pole that saves space and adjusts to fit the job.

Double locks (internal lock and external cap) ensure poles will not collapse, offering a secure connection at any length for maximum versatility and safety. An internal stop prevents pole separation when fully extended.

Double Lock™ System

Extend pole sections to desired length, twist top pole to engage internal lock then tighten outer cap lock to secure.

Lightweight, durable fiberglass will not crimp under high stress like aluminum poles.

Telescoping Pole with Female Ferrule

Use Pruner or Pole Saw with the same pole

Telescoping Pole with Adapter

Allows for permanent mounting of 1.25" i.d. sawhead section, pruner or ferrule.

Double-Lock™ Telescoping Poles	Part Number
3-6' Telescoping Pole with JA-14S Pruner & Rope	TP-6-14
6-12' Telescoping Pole with JA-14S Pruner & Rope	TP-12-14
7-14' Telescoping Pole with JA-14S Pruner & Rope	TP-14-14
3-6' Telescoping Pole with SB-TE-13 Tri-Cut Saw Blade	TP-6-S
6-12' Telescoping Pole with SB-TE-13 Tri-Cut Saw Blade	TP-12-S
7-14' Telescoping Pole with SB-TE-13 Tri-Cut Saw Blade	TP-14-S
6-12' Telescoping Pole with PH-11 Pruner, SB-1T Saw Blade, Rope	TP-12-11
7-14' Telescoping Pole with PH-11 Pruner, SB-1T Saw Blade, Rope	TP-14-11
3-6' Telescoping Pole with Female Ferrule	TP-6F
6-12' Telescoping Pole with Female Ferrule	TP-12F
7-14' Telescoping Pole with Female Ferrule	TP-14F
Package: TP-12F Telescoping Pole, JA-14 Pruner, PHA-14 Adapter, Pruner Rope, PS-3FP Pole Saw Head and 13" Tri-Cut Saw Blade	TP-12PKG1
3-6' Telescoping Pole with Adapter	TP-6
6-12' Telescoping Pole with Adapter	TP-12
7-14' Telescoping Pole with Adapter	TP-14
