

12-VOLT DC BATTERY PACK LIGHT

Lighting For Areas Without Power

Fluorescent 13 watt battery light is ideal for emergency applications when power is not available or in equipment rooms and basements where water is a concern.

Light operates off battery pack or direct 12 volt source. Battery Pack features "Smart Charger" to prevent over charging battery.

2.3 Ah battery operates light at full brightness for 2 hours; 7.4 Ah battery operates light at full brightness for 7 hours.

The light's coiled cord attaches to battery pack housed in nylon pouch on an adjustable belt.

Removable Charger Pouch With 12 Volt DC Inverter
