

GENERAL PURPOSE STRINGABLE SHELTER LIGHTS

STRING LIGHT

High Intensity Universal Lighting

General purpose stringable lights are suitable for applications that do not involve sensitivity or peripheral electronic equipment. They feature a twin-lamp design for high intensity lighting.

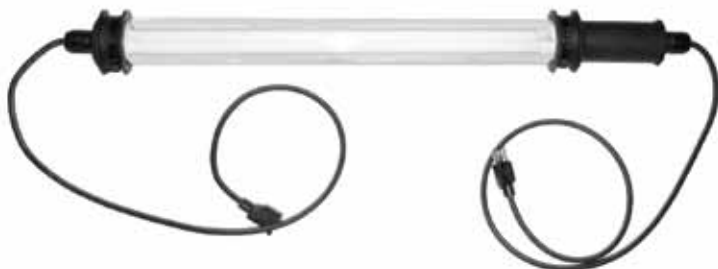

Lights operate independently with on/off switches, allowing any combination of lights to operate.

Commonly used in Maintenance Enclosures or Decontamination Shelters.

Jameson general purpose stringable lights are now available with optional 110V - 230V capability.

Meets U.S. and Canadian standards for water resistant portable lighting.

- Low Amp Draw
- No Heat Build Up
- Flicker Free
